EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Pezzner on March 26, 2007.

The application has been amended as follows: In line 1 of claim 18, "claim 16" has been replaced with --- claim 12---.

The following is an examiner's statement of reasons for allowance: Use of a melamine as a stabilizer for polyoxymethylene copolymer is known as taught by US Pats. 6,391,956 (col. 9, lines 37-64) and 4,780,498 (col. 8, lines 3-16). US Pat. 4,517,319 teaches various fillers such as magnesium oxide and zinc oxide for polyoxymethylene copolymer at col. 6, lines 22-52. However, US Pat. 5,478,895 teaches that zinc oxide is not a good filler for polyoxymethylene copolymer in table 1 wherein magnesium oxide is taught as a good filler, for example. Thus, US Pat. 5,478,895 teaches away from using zinoc oxide, and furthermore, example 5 (with zinc oxide) has yielded superior properties to comparative example 3 (without zinc oxide) in table of page 9

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
